Aditya Prakash Purohit

Software Developer | Frontend / React | AI/ML

7683894404 | adityaprakashpurohit@gmail.com | LinkedIn | Portfolio | GitHub

Summary

Final-year B.Tech Computer Science Engineering student at GIET University with hands-on experience in frontend development, software engineering, AI/ML, and data analytics. Skilled in React.js, JavaScript, TypeScript, Tailwind CSS, Python, MySQL, Git, and REST APIs, with experience building structured, responsive web applications and contributing to technical communities. Seeking Software Engineering, Frontend/React, or AI/ML internship opportunities.

Education

GIET University, Gunupur Aug 2023 – Aug 2027
Bachelor of Technology (B.Tech), Computer Science Engineering

Kendriya Vidyalaya Mar 2022 – Mar 2023
Class XII, Computer Science

Experience

Code Quest Club, GIET University Jun 2025 – Present
Presentation Specialist / Graphic Designer *Gunupur, Odisha*

- Designed promotional campaigns and social media graphics that contributed to a reported 30% increase in club engagement and reached 500+ students per campaign.
- Developed Python automation scripts that reduced content-workflow preparation time by approximately 30%.

Tech'HUB Club, GIET University Jul 2025 – Jan 2026
Technician / Frontend Contributor *Gunupur, Odisha*

- Contributed to frontend development for club projects and supported workshops and coding events focused on practical software development.
- Mentored 100+ peers in web development and Python through technical sessions, coding activities, and peer learning.

Projects

MotoRent – Bike Rental & Booking Platform GitHub
React.js, React Router, Context API, Tailwind CSS, Framer Motion, Recharts, React Three Fiber

- Built a React-based bike rental platform with public bike browsing and details pages, customer authentication, rental forms, booking summary, payment, and booking-success flows.
- Implemented protected customer and admin navigation with separate layouts, including admin dashboard modules for bike, booking, and payment management.
- Designed multi-step booking state management with React Context API for bike, personal, rental, and amount data, with clear/reset booking state support.

Student ERP – Academic Management System GitHub
React.js, JavaScript, Tailwind CSS, REST APIs

- Developed a role-oriented academic management interface for common student and institutional workflows, focusing on reusable React components and responsive UI.
- Structured application navigation and frontend data flows to support maintainable modules for academic information and user interactions.

AI/ML & Data Analytics Projects GitHub
Python, Scikit-Learn, Data Analytics

- Built and explored Python-based machine learning and data-analysis solutions using Scikit-Learn, applying preprocessing, model development, and evaluation concepts.
- Applied programming and analytical techniques to transform datasets into actionable results and demonstrate practical AI/ML fundamentals.

Technical Skills

Languages:	JavaScript, TypeScript, Python, HTML5, CSS3
Frontend:	React.js, React Router, Tailwind CSS, Context API, Responsive Web Development
Libraries:	Framer Motion, Recharts, React Three Fiber, Tkinter, Scikit-Learn
Backend/Data:	REST APIs, MySQL
Developer Tools:	Git, GitHub, Vite, npm, Browser DevTools
